Grave with no visible marker but with name/s from IW Bereavement Services records.

Grave with no visible marker and no record of burial from IW Bereavement Services records.

A number in the corner of any grave indicates the Plot Number where known.

## **MISCELLANEOUS MARKINGS & WARNINGS**

Tree indicating approximate position and spread of the canopy. Where the marking includes a small dark green tree with a number in white this relates the tree to the RSHG tree survey.

Area shaded to indicate a tangle of trees or other vegetation obscuring a number of graves.

Building indicated with name to assist in location of graves.

Symbol indicating the number of the RSHG Map adjoining in the direction indicated.

Grid reference lines together with letters and numbers used to locate specific graves by using the appropriate RSHG alpha index.

Notes detailing various specific aspects of the Map, to indicate names on graves where there is not space for all the names within the grave outline, to indicate areas subdivided for child burial or other unusual details.

There are a number of Warnings on various Maps covering several different aspects. Warnings can refer to possible discrepancies between the IW Bereavement Services records, Plot numbering and the layout of graves on the ground or to other unusual aspects of certain Maps.

This Legend details the meaning of all the symbols and conventions used on the RSHG Maps of Ryde Cemeteries together with various Warnings. The Mapping Project is a work in progress and there can be no guarantee of absolute accuracy.
