## **DATES AND AGES**

This exercise involves the collection of data from headstones etc: on graves where two or more people are buried or remembered. Dates of Birth where given and Dates of Death are recorded on a Spidergram.

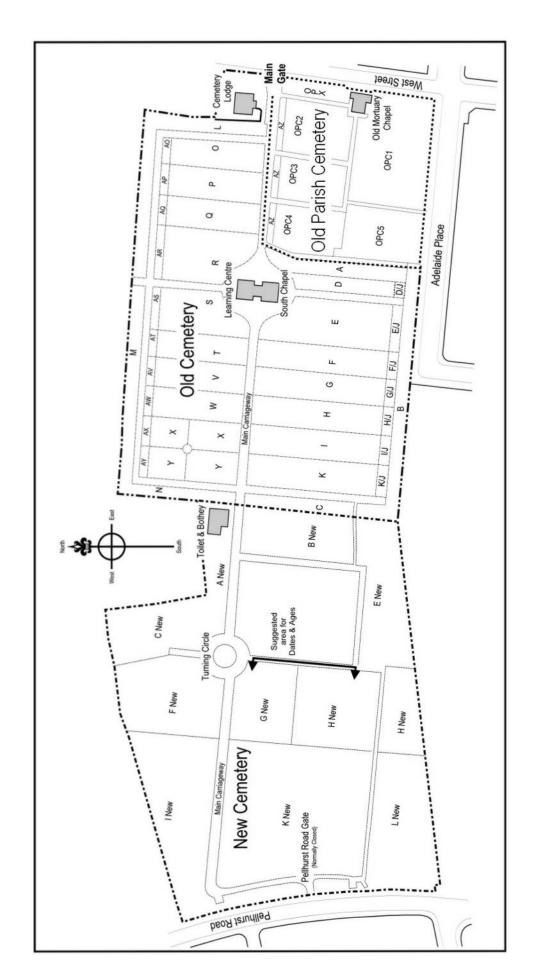

The information is then used to calculate or determine the answers to various questions on the Spidergram.

A Map for the suggested location for this exercise is attached where memorials are comparatively easy to record and access is available without the need to leave a path. The area is indicated by a Line with two Arrows.

A Spidergram is attached for photocopying.
