

ISLE OF WIGHT OBSERVER Saturday 17th June 1922

SUDDEN DEATH. - The sudden death was reported yesterday (Friday), of **Mrs. Harriett JACOBS** of 47 Prince-street. She appeared to have been in her usual health until Saturday, the 10th, when she complained of feeling unwell and of pains practically over the whole of her body. She took to her bed, but was not medically attended until Thursday night, when Dr. KENNEDY was called in, and as he was unable to give a certificate as to the cause of death the Coroner was communicated with. It is believed however to be a case of natural causes.
